1. The profit made by a charity event is given by the formula

$$
\text { profit }=\text { number of tickets sold } \times £ 5-\text { cost of expenses. }
$$

Calculate the profit made when 84 tickets were sold and the cost of the expenses was $£ 120$.

| ENGLAND | WALES | IRELAND | WALES |

Alun has the eight cards shown above. He chooses one card at random.
(a) On the probability scale below, mark the points $\mathrm{A}, \mathrm{B}$ and C where:

A is the probability of Alun choosing a card with WALES written on it.
$\mathbf{B}$ is the probability of Alun choosing a card with FRANCE written on it.
C is the probability of Alun choosing a card with ENGLAND written on it.

(b) The probability of Alun choosing a card at random with SCOTLAND written on it is $\frac{1}{8}$.
What is the probability of Alun choosing a card that does not have SCOTLAND written on it?

5. (a) In each of the following diagrams, shade the smallest number of squares required to answer the question.
(i) Shade the smallest number of squares required to make the line $A B$ a line of symmetry.

(ii) Shade the smallest number of squares required to make the line $P Q$ a line of symmetry.

(b) What is the order of rotational symmetry of the shape shown below?

Order of rotational symmetry = $\qquad$
6. (a)
