The recorded temperatures for five of those days are shown in the table below.

Tuesday was 2°C warmer than Monday.

Saturday was 6°C colder than Friday.

(a) Complete the table for Tuesday and for Saturday.

Calculate the circumference of the circle.
[6]

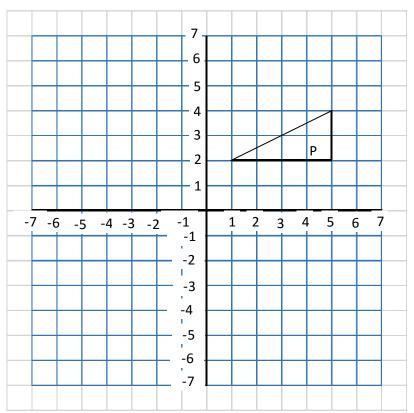

[2]

(b) Describe fully a single transformation that transforms triangle P onto triangle Q [3]

(c) (i) Translate the triangle S using the column vector  $\begin{pmatrix} -4 \\ +2 \end{pmatrix}$ 

[1]

- (d) Write down the column vector that will reverse the translation in part (i) [1]
- 13. A solution to the equation

$$X^3 - x - 5 = 0$$

lies between 1 and 2.

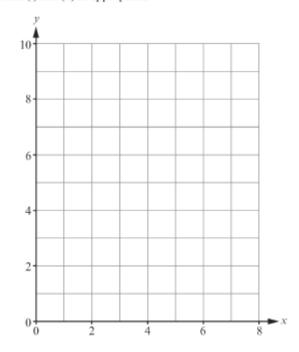

Use the method of trial and improvement to find this solution correct to 1 decimal place. You must show all your working. [4]

(a) Use the grid below to draw graphs to represent each of the following equations.

(i) 
$$y = \frac{1}{2}x + 6$$

(ii) 
$$x + y = 8$$

Label your lines (i) and (ii) as appropriate.

[4]

(b) Using your answer to (a), are the lines  $y = \frac{1}{2}x + 6$  and x + y = 8 perpendicular to each other? Give a reason for your answer.

(b) The diagram below shows a circle with centre O, A, B and C are points on the circumference of the circle. The tangent, PAH, touches the circle at A. OBH is a straight line.
